

A. Course Handout

Institute/School Name	Chitkara University Institute of Engir	Chitkara University Institute of Engineering and Technology			
Department Name	Department of Computer Science & I	Department of Computer Science & Engineering			
Programme Name	Bachelor of Engineering (B.E.), Com	Bachelor of Engineering (B.E.), Computer Science & Engineering			
Course Name	Object Oriented Programming Session 2023-2024				
Course Code	22CS006	Semester/Batch	3rd/2022		
L-T-P (Per Week)	4-0-4 Course Credits 06				
Course Coordinator	Dr. Heena Wadhwa				

CLO01	Understand C++ language features, basics of problem solving aspects for logic building by using data types, variables, operators and expressions.
CLO02	Choose the appropriate object oriented programming constructs to solve the problems using classes, objects, recursion and constructors.
CLO03	Apply inheritance, early binding and late binding in C++ to formulate new solutions for programming problems.
CLO04	Determine the bugs in a program using exceptional handling and recognize basic need of templates.
CLO05	Design and develop reusable and modular code for collaborative team based software development.

1. Objectives of the Course

The course provides a wide scope of learning & understanding of the subject. The main objectives of the course are :

- To formulate proficient solutions of programming problems using object oriented constructs.
- To demonstrate the importance of major features of object oriented programming such as encapsulation, inheritance, code extensibility, reusability, and polymorphism.
- To customize their own templates and implement the generic programming.
- To evaluate and improve the existing programs using Standard Template Library.

2. <u>Course Learning Outcomes</u>

After completion of the course, student should be able to:

Sr. No	Course Outcome	*POs	**CL	***KC	Sessions
CLO01	Understand C++ language features, basics of problem solving aspects for logic building by using data types, variables, operators and expressions.	PO1,PO2,PO4,P O5, PO9,PO12	K2	Factual Conceptual	22
CLO02	Choose the appropriate object oriented programming programming constructs to solve the problems using	PO1,PO2,PO4,P O5, PO12	K3	Conceptual Procedural	19

	classes, objects, recursion and constructors.				
CLO03	Apply inheritance, early binding and late binding in C++ to formulate new solutions for programming problems.	PO1,PO3,PO4,P O5, PO11,PO12	K4	Conceptual Procedural	18
CLO04	Determine the bugs in a program using exceptional handling and recognize basic need of templates.		К3	Procedural	20
CLO05	Design and develop reusable and modular code for collaborative team based software development	PO2,PO4,PO9, PO10,PO11	K4	Procedural	21
Total Con	ntact Hours				100

7. Course Plan:

Lecture Number	Topics	Text Book
1-5	Fundamental and problem solving aspect using C, Introduction to structures, typedef, pointers and nesting structures, functions, structures assignments and arrays, structure members alignment, padding and packing, bit Fields in C, union and enumeration, compilation process	B01,B06
6-9	File handling, pointer with const keyword, inline functions, function pointers, sorting using function pointers, sorting using qsort() in c, variable number of parameters in functions	B06,B07
10-14	Aadvanced concept-stacks using arrays, reverse string using stacks, balanced brackets, postfix evaluation, prefix evaluation and infix to postfix conversion, queues using arrays, circular queues	B06,B07
15-17	Introduction to basic concepts of object-oriented programming, procedural programming versus object oriented programming paradigm, structures versus classes, variables and data types in c++, console i/o, preprocessor directives	B01
18-20	Decision making (if, if-else, if- else-if ladder, switch case, go to), repetitive constructs (for, while, do-while, break, continue)	B01
	ST-1 (Syllabus = (Lecture number 1-20) (Online Platform)	
21-23	Arrays (1d, 2d, multi dimensional), understanding pointers, accessing address of a variable, declaring & initializing pointers, accessing a variable through its pointer, pointer arithmetic, pointer to a pointer, accessing arrays using pointer	B01
24-26	Functions in c++: inline functions, default arguments, function prototyping, function overloading.	B01

27-29		
	Dynamic memory management & pointers - new and delete operators, this pointer, possible problems with the use of pointers - dangling/wild pointers, null pointer	B01,B02
	assignment, memory leak and allocation failures	
30-32	Recursion in c++: recap of recursion, recursion examples, order of execution	B01,B02
33-35	Direct & indirect recursion stack overflow, tail & non-tail recursion	B01
36-38	Classes and objects: oops paradigm and its features, specifying a class, creating class objects, accessing class members.	B01,B02
39-43	Access specifiers – public, private, and protected, objects and memory, static members,	B01,B02
	static objects, constant member function, constant objects, friend functions, friend class,	
	passing object as an argument (by value, by reference and by address), returning object	
	from a function.	
	ST-2 (Syllabus = (Lecture number 21-43) (Online Platform)	
44-48	Constructors and destructors: need for constructors and destructors, , constructor	B01,B02
	overloading, copy constructor, dynamic constructors, destructors, constructors and	
	destructors with static members.	20120
49-55	Operator overloading: defining operator overloading, rules for overloading operators,	B01,B02
	overloading of unary operators, binary operators (+,-,/,*), binary operators using friend	
	functions, manipulation of strings using operators overloading(>,<,= =) , type conversion: basic type to class type, class type to basic type, class to class type.	
56-60	Inheritance: introduction, defining derived classes, forms of inheritance(single,	B01,B02
30 00	multilevel, multiple)	D01,D02
61-64	Hybrid & hierarchical inheritance, ambiguity in multiple and multipath inheritance	B01
65-68	Inheritance with constructor, overriding member functions, order of execution of	B01,B02
05 00	constructors and destructors.	B01,B02
	ST-3 (Syllabus = (Lecture number 44-68) (Online Platform)	
69- 70	Virtual base class, overriding member functions	B02
	_	B02
71-75	Concept of binding - early binding and late binding, virtual functions, pure virtual	B02
	functions, abstract classes	B02
71-75 76-79		
	functions, abstract classes	B02
76-79	functions, abstract classes Virtual destructors & polymorphism Exception handling: review of traditional error handling, basics of exception handling, Exception handling mechanism, throwing mechanism, catching mechanism, rethrowing	B02 B01,B02
76-79 80-84 85-87	functions, abstract classes Virtual destructors & polymorphism Exception handling: review of traditional error handling, basics of exception handling, Exception handling mechanism, throwing mechanism, catching mechanism, rethrowing an exception, specifying exceptions.	B02 B01,B02 B03, B04 B04
76-79 80-84	functions, abstract classes Virtual destructors & polymorphism Exception handling: review of traditional error handling, basics of exception handling, Exception handling mechanism, throwing mechanism, catching mechanism, rethrowing	B02 B01,B02 B03, B04
76-79 80-84 85-87	functions, abstract classes Virtual destructors & polymorphism Exception handling: review of traditional error handling, basics of exception handling, Exception handling mechanism, throwing mechanism, catching mechanism, rethrowing an exception, specifying exceptions.	B02 B01,B02 B03, B04 B04 B03
76-79 80-84 85-87 88-90	functions, abstract classes Virtual destructors & polymorphism Exception handling: review of traditional error handling, basics of exception handling, Exception handling mechanism, throwing mechanism, catching mechanism, rethrowing an exception, specifying exceptions. Function templates, class templates, overloading of template functions.	B02 B01,B02 B03, B04 B04 B03
76-79 80-84 85-87 88-90	functions, abstract classes Virtual destructors & polymorphism Exception handling: review of traditional error handling, basics of exception handling, Exception handling mechanism, throwing mechanism, catching mechanism, rethrowing an exception, specifying exceptions. Function templates, class templates, overloading of template functions. Introduction to the standard template library (containers, algorithms, iterators, vectors): sequence container: vector(push_back(),pop_back(),back(),size(),empty()), list(push_front(),pop_front(),front(),size(),empty())	B02 B01,B02 B03, B04 B04 B03
76-79 80-84 85-87 88-90 91-93	functions, abstract classes Virtual destructors & polymorphism Exception handling: review of traditional error handling, basics of exception handling, Exception handling mechanism, throwing mechanism, catching mechanism, rethrowing an exception, specifying exceptions. Function templates, class templates, overloading of template functions. Introduction to the standard template library (containers, algorithms, iterators, vectors): sequence container: vector(push_back(),pop_back(),back(),size(),empty()), list(push_front(),pop_front(),front(),size(),empty()) dequeue(push_back(),pop_back(),push_front(),pop_front(),size(),empty())	B02 B01,B02 B03, B04 B04 B03 B03, B05
76-79 80-84 85-87 88-90	functions, abstract classes Virtual destructors & polymorphism Exception handling: review of traditional error handling, basics of exception handling, Exception handling mechanism, throwing mechanism, catching mechanism, rethrowing an exception, specifying exceptions. Function templates, class templates, overloading of template functions. Introduction to the standard template library (containers, algorithms, iterators, vectors): sequence container: vector(push_back(),pop_back(),back(),size(),empty()), list(push_front(),pop_front(),front(),size(),empty()) dequeue(push_back(),pop_back(),push_front(),pop_front(),size(),empty()) Associative container: set(insert(),erase(),size(),empty(),count(),clear()),	B02 B01,B02 B03, B04 B04 B03 B03, B05
76-79 80-84 85-87 88-90 91-93	functions, abstract classes Virtual destructors & polymorphism Exception handling: review of traditional error handling, basics of exception handling, Exception handling mechanism, throwing mechanism, catching mechanism, rethrowing an exception, specifying exceptions. Function templates, class templates, overloading of template functions. Introduction to the standard template library (containers, algorithms, iterators, vectors): sequence container: vector(push_back(),pop_back(),back(),size(),empty()), list(push_front(),pop_front(),front(),size(),empty()) dequeue(push_back(),pop_back(),push_front(),pop_front(),size(),empty()) Associative container: set(insert(),erase(),size(),empty(),count(),clear()), multiset(insert(),erase(),size(),empty(),count(),clear()),	B02 B01,B02 B03, B04 B04 B03 B03, B05
76-79 80-84 85-87 88-90 91-93	functions, abstract classes Virtual destructors & polymorphism Exception handling: review of traditional error handling, basics of exception handling, Exception handling mechanism, throwing mechanism, catching mechanism, rethrowing an exception, specifying exceptions. Function templates, class templates, overloading of template functions. Introduction to the standard template library (containers, algorithms, iterators, vectors) : sequence container: vector(push_back(),pop_back(),back(),size(),empty()), list(push_front(),pop_front(),front(),size(),empty()) dequeue(push_back(),pop_back(),push_front(),pop_front(),size(),empty()) Associative container: set(insert(),erase(),size(),empty(),count(),clear()), multiset(insert(),erase(),size(),empty(),count(),clear()), map(insert(),erase(),size(),empty(),count(),clear()),	B02 B01,B02 B03, B04 B04 B03 B03, B05
76-79 80-84 85-87 88-90 91-93	functions, abstract classes Virtual destructors & polymorphism Exception handling: review of traditional error handling, basics of exception handling, Exception handling mechanism, throwing mechanism, catching mechanism, rethrowing an exception, specifying exceptions. Function templates, class templates, overloading of template functions. Introduction to the standard template library (containers, algorithms, iterators, vectors): sequence container: vector(push_back(),pop_back(),back(),size(),empty()), list(push_front(),pop_front(),front(),size(),empty()) dequeue(push_back(),pop_back(),push_front(),pop_front(),size(),empty()) Associative container: set(insert(),erase(),size(),empty(),count(),clear()), multiset(insert(),erase(),size(),empty(),count(),clear()), map(insert(),erase(),size(),empty(),count(),clear()), multimap(insert(),erase(),size(),empty(),count(),clear())	B02 B01,B02 B03, B04 B04 B03 B03, B05
76-79 80-84 85-87 88-90 91-93	functions, abstract classes Virtual destructors & polymorphism Exception handling: review of traditional error handling, basics of exception handling, Exception handling mechanism, throwing mechanism, catching mechanism, rethrowing an exception, specifying exceptions. Function templates, class templates, overloading of template functions. Introduction to the standard template library (containers, algorithms, iterators, vectors): sequence container: vector(push_back(),pop_back(),back(),size(),empty()), list(push_front(),pop_front(),front(),size(),empty()) dequeue(push_back(),pop_back(),push_front(),pop_front(),size(),empty()) Associative container: set(insert(),erase(),size(),empty(),count(),clear()), multiset(insert(),erase(),size(),empty(),count(),clear()), multimap(insert(),erase(),size(),empty(),count(),clear()) Derived container: stack, queue, priority_queue, algorithms:	B02 B01,B02 B03, B04 B04 B03 B03, B05
76-79 80-84 85-87 88-90 91-93	functions, abstract classes Virtual destructors & polymorphism Exception handling: review of traditional error handling, basics of exception handling, Exception handling mechanism, throwing mechanism, catching mechanism, rethrowing an exception, specifying exceptions. Function templates, class templates, overloading of template functions. Introduction to the standard template library (containers, algorithms, iterators, vectors) : sequence container: vector(push_back(),pop_back(),back(),size(),empty()), list(push_front(),pop_front(),front(),size(),empty()) dequeue(push_back(),pop_back(),push_front(),pop_front(),size(),empty()) Associative container: set(insert(),erase(),size(),empty(),count(),clear()), multiset(insert(),erase(),size(),empty(),count(),clear()), multimap(insert(),erase(),size(),empty(),count(),clear()) Derived container: stack, queue, priority_queue, algorithms: count(),count_if(),find(),find_if(),copy(),fill(),remove(), remove_copy(), replace(),	B02 B01,B02 B03, B04 B04 B03 B03, B05
76-79 80-84 85-87 88-90 91-93	functions, abstract classes Virtual destructors & polymorphism Exception handling: review of traditional error handling, basics of exception handling, Exception handling mechanism, throwing mechanism, catching mechanism, rethrowing an exception, specifying exceptions. Function templates, class templates, overloading of template functions. Introduction to the standard template library (containers, algorithms, iterators, vectors): sequence container: vector(push_back(),pop_back(),back(),size(),empty()), list(push_front(),pop_front(),front(),size(),empty()) dequeue(push_back(),pop_back(),push_front(),pop_front(),size(),empty()) Associative container: set(insert(),erase(),size(),empty(),count(),clear()), multiset(insert(),erase(),size(),empty(),count(),clear()), multimap(insert(),erase(),size(),empty(),count(),clear()) Derived container: stack, queue, priority_queue, algorithms: count(),count_if(),find(),find_if(),copy(),fill(),remove(), remove_copy(), replace(), replace_copy(),reverse(),reverse_copy(), unique(),unique_copy(),max(),	B02 B01,B02 B03, B04 B04
76-79 80-84 85-87 88-90 91-93	functions, abstract classes Virtual destructors & polymorphism Exception handling: review of traditional error handling, basics of exception handling, Exception handling mechanism, throwing mechanism, catching mechanism, rethrowing an exception, specifying exceptions. Function templates, class templates, overloading of template functions. Introduction to the standard template library (containers, algorithms, iterators, vectors) : sequence container: vector(push_back(),pop_back(),back(),size(),empty()), list(push_front(),pop_front(),front(),size(),empty()) dequeue(push_back(),pop_back(),push_front(),pop_front(),size(),empty()) Associative container: set(insert(),erase(),size(),empty(),count(),clear()), multiset(insert(),erase(),size(),empty(),count(),clear()), multimap(insert(),erase(),size(),empty(),count(),clear()) Derived container: stack, queue, priority_queue, algorithms: count(),count_if(),find(),find_if(),copy(),fill(),remove(), remove_copy(), replace(),	B02 B01,B02 B03, B04 B03 B03, B05 B03, B05

88-90	Function templates, Class templates, Overloading of template functions.	https://ocw.mit.edu/cours es/electrical-engineering-and-computer-science/6-096-introduction-to-c-january-iap-2011/lecture-notes/MIT6_096IAP11_l ec09.pdf https://ocw.mit.edu/cours es/electrical-engineering-and-computer-science/6-096-introduction-to-c-january-iap-2011/lecture-notes/MIT6_096IAP11_l ec09.pdf	https://www.youtube.com /watch?v=zjXso3X2jms https://www.youtube.com /watch?v=zjXso3X2jms
91-93	Introduction to the Standard Template Library (Containers, Algorithms, Iterators): Sequence Container: vector(push_back(),pop_back(),back(),siz e(),empty()), list(push_front(),pop_front(),front(),size() ,empty()) dequeue(push_back(),pop_back(),push_fr ont(),pop_front(),size(),empty())	https://www.geeksforgee ks.org/cpp-stl-tutorial/ https://courses.cs.washin gton.edu/courses/cse333/ 18su/lectures/14-c++- STL.pdf	https://www.youtube.com /watch?v=W7uB9-TKfTg
94-97	Associative Container: set(Insert(),erase(),Size(),Empty(),Count(),Clear()), multiset(Insert(),erase(),Size(),Empty(),C ount(),Clear()), map(Insert(),erase(),Size(),Empty(),Coun t(),Clear()), multimap(Insert(),erase(),Size(),Empty(), Count(),Clear())	https://www.geeksforgee ks.org/cpp-stl-tutorial/	https://www.youtube.com /watch?v=W7uB9-TKfTg

98-100	Derived Container: stack, queue,	https://www.geeksforgee	https://www.youtube.com
	priority_queue, ALGORITHMS:	ks.org/cpp-stl-tutorial/	/watch?v=W7uB9-TKfTg
	<pre>count(),count_if(),find(),find_if(),copy(),f</pre>		
	ill(),remove(), remove_copy(), replace(),		
	replace_copy(),reverse(),reverse_copy(),		
	unique(),unique_copy(),max(),		
	max_element(), min(),min_element(),		
	iterators: input, output, forward,		
	vectors:back(),begin(),clear(),empty(),en		
	d(), erase(),pop_back(),push_back()		

9. Action plan for different types of learners

Slow Learners	Average Learners	Fast Learners
Remedial Classes	Pre-coded algorithms to	Design solutions for complex
Doubt Sessions	illustrate concepts	problems
Guided Tutorials	E-notes and E-exercises to read	Coding Competitions,
Use of audio and visual material	ahead of the pedagogic material	Project

10. Evaluation Scheme & Components:

Evaluation Component	Type of Component	No. of Assessments	Weightage of Component	Mode of Assessment
Component 1	Sessional Tests (STs)	03**	40%	Online platform
Component 2	End Term Examination	01***	60%	Online platform
Total		100%		

^{**}Out of 03 STs, the ERP system automatically picks the best 02 ST.

11. Syllabus of the Course:

S.No.	Topic (s)	No. of Sessions	Weightage %
1	Fundamental and problem-solving aspect using C, Introduction to	20	27%
	Structures, typedef, pointers and nesting structures, functions, structures assignments and arrays, structure members alignment,		
	Padding and Packing, Bit Fields in C, Union and Enumeration, compilation process		
	File Handling, Pointer with const keyword, Inline functions, function pointers, sorting using function pointers, sorting using qsort() in C, variable number of parameters in functions,		
	Advanced concept-Stacks using arrays, Reverse string using stacks, balanced brackets, postfix evaluation, prefix evaluation and infix to postfix conversion, queues using Arrays, Circular queues		
	Introduction to basic concepts of object-oriented programming, Procedural Programming versus Object Oriented Programming paradigm, Structures versus Classes, Variables and Data Types in C++, Console I/O, Preprocessor directives		

^{***}As per Academic Guidelines minimum 85% attendance is required to become eligible for appearing in the End Semester Examination.

	Decision making (if, if-else, if- else-if ladder, switch case, go to), Repetitive Constructs (for, while, do-while, break, continue)			
	ST-1 (Covering 27% syllabus)			
2	Arrays (1D, 2D, multi-dimensional), Understanding pointers, accessing address of a variable, Declaring & initializing pointers, accessing a variable through its pointer, Pointer arithmetic, Pointer to a pointer, accessing arrays using pointer, Pointer Arithmetic in C++, Pointer Arithmetic with Pointers	23	27%	
	Functions in C++: Inline functions, Default arguments, Function prototyping, Function Overloading, Parameter passing techniques,			
	Dynamic memory management & Pointers - new and delete Operators, this Pointer, Possible problems with the use of pointers - Dangling/wild pointers, Null pointer assignment, Memory leak and allocation failures			
	Recursion in C++: Recap of Recursion, Recursion Examples, Order of Execution, direct & Indirect Recursion Stack Overflow, Tail & Non-tail Recursion			
	Classes and Objects: OOps Paradigm and its features, specifying a class, Creating class objects, Accessing class members.			
	Access specifiers – public, private, and protected, Objects and memory, Static members, Static objects, Constant member function, Constant objects, Friend functions, Friend class, Passing Object as an argument (by value, by reference and by address), Returning			
	object from a function.			
	ST-2 (Covering 27% syllabus)			
3	Constructors and Destructors: Need for constructors and destructors, Constructor overloading, Copy constructor, Dynamic constructors, Destructors, Constructors and destructors with static members.	23	25%	
	Operator Overloading: Defining operator overloading, Rules for overloading operators, overloading of unary operators, Binary operators (+, -, /, *), Binary operators using friend functions, Manipulation of strings using operators overloading (>, <, = =), Type conversion: Basic type to class type, Class type to basic type, Class to class type.			
	nheritance: Introduction, Defining derived classes, Forms of Inheritance (single, multilevel, multiple) Hybrid & hierarchical inheritance, ambiguity in multiple and multipath inheritance. Inheritance with constructor, Overriding member functions, Order of execution of constructors and destructors.			
ST-3 (Covering 25% syllabus)				
4	Virtual base class, Overriding member functions Concept of Binding - Early binding and late binding,			
	Virtual functions, Pure virtual functions, Abstract classes Virtual destructors & polymorphism			
	Exception Handling: Review of traditional error handling, Basics of exception handling, Exception handling mechanism, Throwing mechanism, Catching mechanism, Rethrowing an exception,			

9

Specifying exceptions. Function templates, Class templates,		
Overloading of template functions.		
Introduction to the Standard Template Library		
Containers, Algorithms, Iterators, Vectors): Sequence Container:		
vector(push_back(),pop_back(),back(),size(),empty()),		
list(push_front(),pop_front(),front(),size(),empty())		
dequeue(push_back(),pop_back(),push_front(),pop_front(),size(),e		
mpty())		
Associative Container:		
set(Insert(),erase(),Size(),Empty(),Count(),Clear()),		
multiset(Insert(),erase(),Size(),Empty(),Count(),Clear()),		
map(Insert(),erase(),Size(),Empty(),Count(),Clear()),		
multimap(Insert(),erase(),Size(),Empty(),Count(),Clear())		
Derived Container: stack, queue, priority_queue, ALGORITHMS:		
count(),count_if(),find(),find_if(),copy(),fill(),remove(),		
remove_copy(), replace(), replace_copy(), reverse(),		
reverse_copy(), unique(),unique_copy(), max(), max_element(),		
min(),min_element(), iterators: input, output, forward,		
V V - V V V V V V V V V V V V - V		
vectors:back(),begin(),clear(), empty(),end(),		
erase(),pop_back(),push_back()		
End Term Examination will be based on 100% syllabus.
